tesnat.org
Dear Colleagues,

Welcome to the 3rd International Conference on Theoretical and Experimental Studies in Nuclear Applications and Technology (TESNAT 2017). This conference is the third step of the TESNAT Conference series. TESNAT 2015 was held in Osmaniye Korkut Ata University, Osmaniye and TESNAT 2016 was held in Mustafa Kemal University, Hatay. The world of nuclear physics is an exciting area in which to work, and we’ll continue to meet and bring inspired people together in conference like this, to ensure TESNAT remains at the cutting edge.

We intend in this conference to discuss and compare all applicable methods as are being applied at present in nuclear physics. The problems faced in these fields at present are focused in the development of new methods and in the improving of existing techniques to achieve an understanding of existing experimental data and in predicting with high reliability new properties and processes. We propose this conference as a mean to bring together all these related communities with the goal of creating an enriching dialog across the disciplines. The conference will give an overview on the theoretical and experimental challenges in nuclear physics and applications.

We’d like to thank each of you for attending our conference and bringing your expertise to our gathering. You are truly our greatest asset today and tomorrow, and we could not accomplish what we do without your support and leadership.

TESNAT 2017 Organization Committee
Committees

Honorary Committee

Prof. Dr. Mustafa KİBAR
Rector, Çukurova Uni.
Prof. Dr. Murat TÜRK
Rector, Osmaniye Korkut Ata Uni.
Zafer ALPER
Director, TAEK

Organising Committee

Prof. Dr. Eyyup TEL (Chair)
Osmaniye Korkut Ata University, Turkey
Assoc. Prof. Dr. Ismail H. Sarpün (Coor.)
Afyon Kocatepe University, Turkey
Prof. Dr. Arjan KONING
International Atomic Energy Agency (IAEA), Austria
Prof. Dr. Abdullah AYDIN
Kırıkkale University, Turkey
Prof. Dr. Mohamed BELGAID
University of Sciences and Technology Houari Boumediene, Algeria
Prof. Dr. Abdullah KAPLAN
Süleyman Demirel University, Turkey
Prof. Dr. Jameel-Un NABI
GIK, Pakistan
Prof. Dr. Mustafa TOPAKSU
Çukurova University, Turkey
Prof. Dr. Ayşel KAYIŞ TOPAKSU
Çukurova University, Turkey
Dr. Ahmed AZBOUCHE
Nuclear Research Center of Algeria, Algeria
Assoc. Prof. Dr. Bayram DEMİR
İstanbul University, Turkey
Assoc. Prof. Dr. Muhittin ŞAHAN
Osmaniye Korkut Ata University, Turkey
Assist. Prof. Dr. Nina TUNCER
Akdeniz University, Turkey

Local Organizing Committee

Dr. Ahmet BÜLBÜL (Conf. Secretary)
Osmaniye Korkut Ata University
Dr. Ercan YILDIZ
Kırıkkale University
Dr. Mehmet YÜKSEL
Çukurova University
Dr. Tamer DOĞAN
Çukurova University
Dr. Yusuf KAVUN
Akdeniz University
Res. Asst. Sibel AKÇA
Çukurova University
Res. Asst. Ziyafer Gizem PORTAKAL
Çukurova University
Res. Asst. Sümeyra BALCI YEĞEN
Çukurova University
Hasancan ALKANLI
Osmaniye Korkut Ata University
Hatice BİLGİN
Afyon Kocatepe University

Scientific Committee

Prof. Dr. Emel ALĞIN
Eskisehir Osmangazi University, Turkey
Prof. Dr. Hüseyin AYTEKİN
Bülent Ecevit University, Turkey
Dr. Ahmed AZBOUCHE
Nuclear Research Center of Algeria, Algeria

³Osmaniye Korkut Ata University, Physics Department, Osmaniye, Turkey

In local, regional and global context, it is necessary to study the environmental radioactivity. Natural radioactivity (²³⁸U, ²³²Th, ⁴⁰K), originates from radioactive elements in the earth crust and from extraterrestrial sources, and artificial radioactivity (¹³⁷Cs), the result of man-made actions, are the main objects of this study. The activity concentrations in 18 soil samples collected from Southeastern Anatolia (Adıyaman, Gaziantep, Şanlıurfa cities and their surrounded districts) measured through HPGe gamma ray spectrometry at Çukurova University, Physics Department. The average values of ²³⁸U, ²³²Th, ⁴⁰K, ¹³⁷Cs activity concentration that soil samples contain were found to be 14.48 Bq/kg, 19.15 Bq/kg, 288.92 Bq/kg, 5.16 Bq/kg, respectively. The results obtained in this study were compared with the international average values reported by UNSCEAR, 2000.

This work was supported by Research Fund of the Çukurova University (Project Number: FBA-2015-3649).
